numerati da Cataldo Serafini ne set=
tembre del 1978

On the fire, water and tea steeping

What is nubile is the steeping

The story is in the steeping

While the units for telling are such as water, tea, fire

Water remembered, tea, remembered

Tea envisioned

Fire enabling

Oh morning of the crisp reader,

Oh tincture of friendship,

Rose wool shine of divine palpability

As suggestions of horizontality arise

By order of the shadows of up and down

Nubility smiles a weave

By the thread of the steeped moment

Rises the moment of the poignancy of steep

As dripping with the moment of steep

Steeps the splashing of nubility

As steeping draws to a thread
While thread steeps wider than bosom
Comes excruciating mouth-watering of steeping
And the thud call of the will of steep to thread

In the oh recognition,

In the succinction of blatantness,

Steeping is enveloped by nubility enveloping thread

Thus may steeping envision (infer) thread

That thread may envision (imply) steeping

Immediately do all the many thread of steeping
clamor for attention

Then verily, the cut of the steep
Steeping scarred with the handsomeness of thread
Thus any cross-section tells a weave
While nubility abounds in the will of the moment

Till the recognition of nubility implies a ' new ' weave

That the steeping might re-thread

That the steeping be no less believable than the thread

So as not to be uniformly thread-bare

The steeping thread: glamorous insert
Into the threading of steeping
Erupted thread of the steep
Abrupt steeped thread

Steeped to a thread
Threaded into the unravel of steeping
Steeping of non-thread into thread
Threads of the splashes of steeping

Steeping coined as all-threaded

All-threaded allowed to steep

Comes the woof of steeping intending

Whose extent is that of the threading

Just as thread intended into warping

Tells the extent of a tendency of steeping

It is a raveled steep we weave, when first we practice to perceive
Such are the attenuated circumstances from which
Ostensibly compounded
The tender birthright of tenuosity

Pointless to attempt anything in which one is not steeped

Now latent reader of implications,

On besh of significance,

A conjunction as a unit

As though to make thread were a function of steeping

As much as that threads are induced from steeping

While the placing of nubility is on tenterhooks

It is only nubility which portends

As from steeping and threading alike come the weaves of pretend

Even as the attention of steeping is drawn to thread

So steeping is brought to the attention of thread

Each attending to itself and to other

Each the each of each other

Were the pattern to be retained

Thread drawn from steeping

Drawn through steeping threaded

Would not attention appear clothed?
